1. Caption for a SVG diagram ..... iv

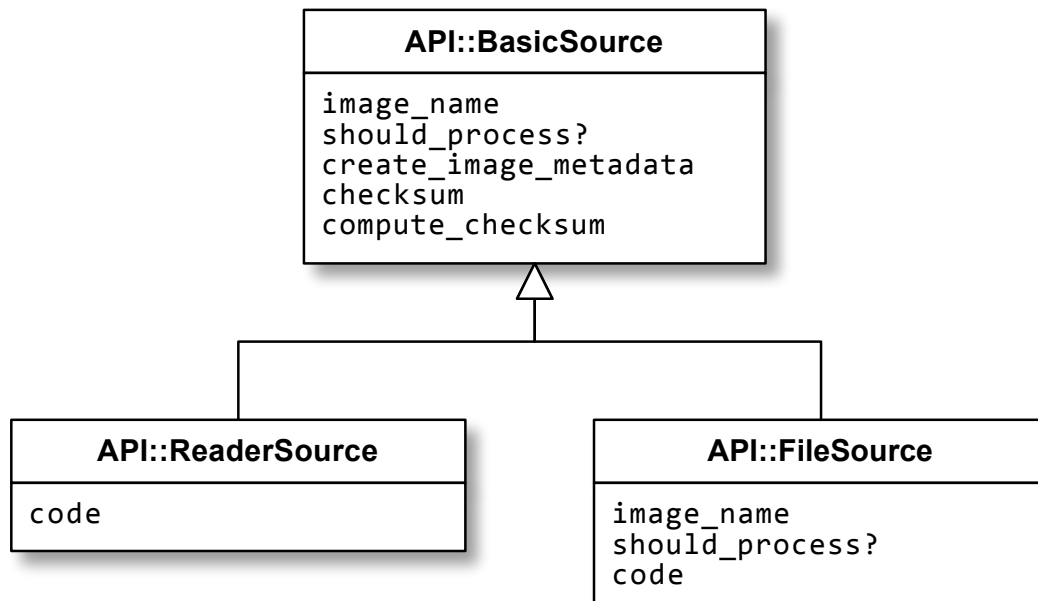

**Figure 1. Caption for a SVG diagram**

- I'd like to remove a redundant vertical space between the diagram above and the caption.
- I suppose Height 275 below is too much.

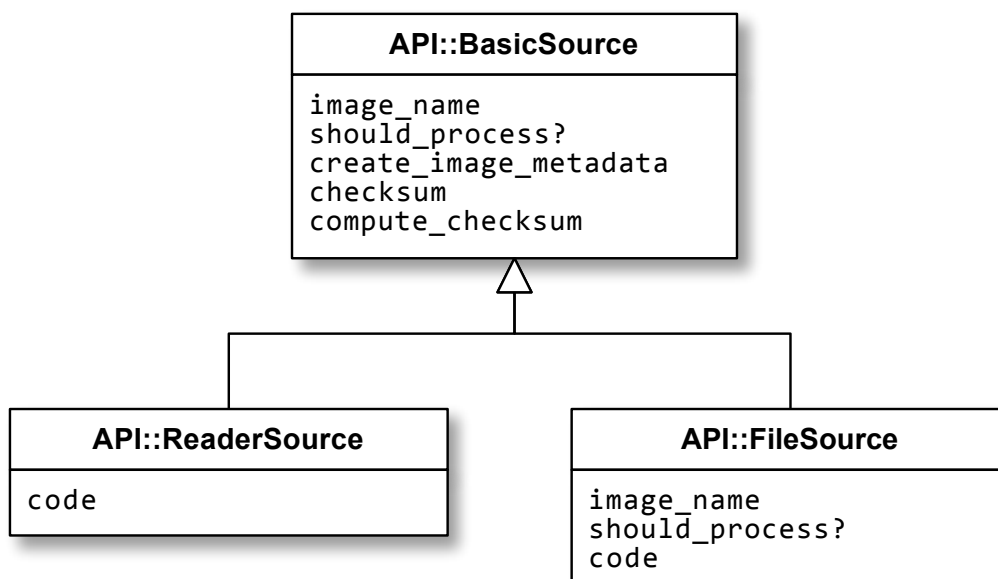

---

```
<<
  /Name /Im7
  /Type /XObject
  /Length 29 0 R
  /Filter /FlateDecode
  /Subtype /Image
  /Width 417
  /Height 275
  /BitsPerComponent 8
  /ColorSpace /DeviceGray
>>
```

---

- There is still a redundant vertical space even when I do not have a caption, so the redundant space seems to be inside the image.

- However, the diagram becomes too small if I set the height as well as the width.
- And there still exists a redundant vertical space. I'd like to remove it!
